A.I.-code	361115	Beta Casein	A1/A1
aAa code	534	Cow family	
colour	ZB	Straw colour	Oranje
Breed	100% FH/BF		

Adams Cash makes polled genetics available for the Dutch Friesian breed. This heterozygous polled bull is also a welcome addition for farmers who crossbreed with DF and are looking for a polled bull. Cash is strong, well developed, has a wonderful black coat, good width and correct legs. His daughters in Ireland have higher components and good fertility, and show good progression in the second lactation.

His maternal line is known for great longevity. Cash's dam is extremely fertile and has completed 11 lactations, with a short calving interval. She also matured late, and improved her performance at each lactation with good production figures for kg of milk and protein percentages. She is classified EX 90 with EX 94 for legs. The grand dam of Cash also realised an impressive performance with 9 lactations, and good component percentages for the UK. She is classified VG 87, also with an excellent score for legs.

Cash was sired by Deangate Quadrant (Marshside Rocket 3 x Huddlesford Desert Orchid). He is a reliable and daughter-proven sire in the UK. His production index is around the average of the population, but he really excels for conformation. His daughters score higher than average with good udders and legs, and good chest width and capacity.
