

Alger Meekma

Breeder: A.A. van Velzen, Meedhuizen

- + Pedigree with reliable, proven breeding bulls
- + High components
- + Calving ease bull
- + Beta casein A2/A2
- + aAa 531

Amsweer Dina 8602  
(dam of Amsweer Solution)

## BULL INFORMATION

Name	Amsweer Solution	Date of birth	2017-07-25
Herdbook number	NL 934490407	Gestation length	283
A.l.-code	361147	Kappa Casein	AB
PFW code	A	Beta Casein	A2/A2
aAa code	513642	Cow family	Dina
colour	ZB	Straw colour	Mintgroen
Breed	100% HF		

True to his name, Amsweer Solution (Solero x Legend x Stilist) is the solution for the problems surrounding phosphate and he promises milk with high component percentages. His paternal and maternal pedigrees offer quality in the form of high percentages of fat and protein, and durability is a firm feature of both bloodlines too. Solution has a powerful, wide build (aAa 531) and has the A2A2-gene for beta casein.

Solution's sire Solero has very reliable breeding values for both production - including transmission of sky-high components - and conformation. As they mature, Solero daughters simply get better, and the high survival score for these cows goes to show their enduring presence in the herd. Solero also scores extremely well for udder health, claw health and fertility. To sum up - he wraps up components, longevity, late maturity and health into one neat package.

Solution's maternal line also makes a worthy contribution. His dam may not descend from a particularly well-known line, but nevertheless the cows with this pedigree show impressive performances. The Dina line offers solid conformation, with highlights being good chest width and good body condition. What's more, this family already numbers 17 cows who have produced more than 100 tons of milk, which is less than
