BULL INFORMATION

Name Apina Borg
Date of birth 2019-12-15

Herdbook number NL 642762975

Gestation length 278

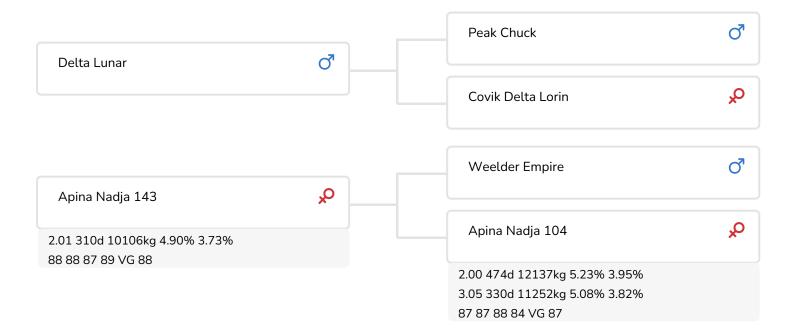

A.I.-code 361218

PFW code C Kappa Casein BB

aAa code 423615 Beta Casein A1/A2
Cow family Nadja

Straw colour Grijs
Breed 100% HF

ZΒ

Apina Borg (Lunar x Empire x Jerod Abel):is bull with a great reputation for components and an exemplary conformation which he has inherited from his pedigree line. Four successive generations of bulls that pass on high component percentages, who are all known to be good calving ease bulls and who score above average for, among other things, fertility. Combined with the good breeding performance shown by the Nadja line, this gives Borg a very realistic chance of becoming a breeding bull.

Borg's sire Lunar is one of these bulls that boost components. His daughters will have a slightly larger than average stature, with well above average width. This calving ease bull also excels in udders and legs, with extremely good scores for udder health, fertility, hoof health and durability.

Borg's maternal line is the Nadja family. This pedigree has established a good international name over the years. This line originated in Italy and has claimed breeding successes in several countries, including the Netherlands. One of the best-known breeding bulls in the Netherlands is the red-factor carrier bull Malcolm, out of the excellent cow Nadja. This Ramos
