Herdbook number	IE 224189540856	Kappa Casein	
A.I.-code	782282	Beta Casein	A2/A2
aAa code	156324	Cow family	
colour	ZB	Straw colour	Green
Breed	100% HF		

In the form of Ballintosig Dell Boy (Ronaldo x Everest x Gibor) K.I. SAMEN has a bull in its portfolio with mainly Irish and New Zealand genetics in his pedigree. The bull, who breeds quite small-statureprogeny, and who carries aAa code 156, has a true grazing background (which is very common in Ireland). Dell Boy makes a positive contribution to protein in terms of both percentage and the protein variant (beta casein A2A2). He is also seen as a breed leader for fertility.

An important contribution to this good fertility was passed on from his maternal line, the Annies. The cows from the Annie pedigree calve as standard within a year and therefore have very short milking records. Their great durability gives them the ability to realise a high number of lactations. For example, Dell Boy's great grand dam Annie 296 (EX 90) made seven lactations and his grand dam Annie 479 (EX 90) has noted eight lactations so far.
