

### 783460 • Bento PP Batch P x Hologram P x Rocking-P Graf Lottie Da • aAa: 234

- From the Glenridge Citation Roxy (EX 97) family
- Pedigree with reliable, proven breeding bulls
- Calving ease bull
- Homozygous polled

### PRATICAL PROVEN BREEDING

#### **BULL INFORMATION**

Name Bento PP

Herdbook number DE 0361070374

A.I.-code 783460 aAa code 234 colour ZB

Breed 100% HF

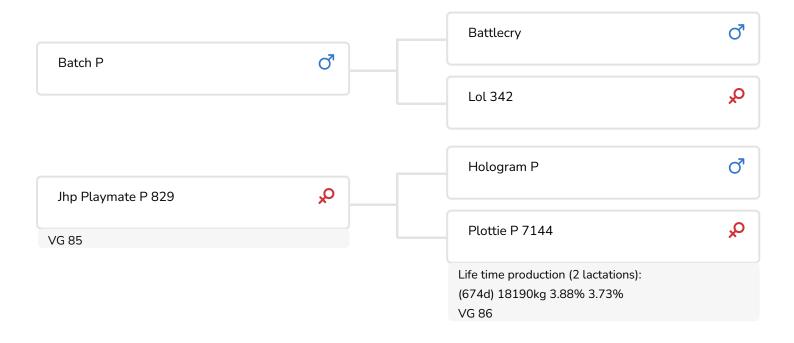

Date of birth 2018-06-23

Kappa Casein AB

Beta Casein A1/A2

Cow family Roxy

Straw colour yellow

The homozygous polled Bento (PP) (Batch P x Hologram P x Lottie) is a bull with two vastly different cow families in his pedigree. In his paternal line, the high components are the striking factor and the foundation of the cow family can be found in the Netherlands. His maternal line, on the other hand - the Roxy family - excels in conformation and originates from the USA.

The breeding value of Batch P, Bento PP's sire and bred from the Lol family, is now based on lactating daughters. He combines a good production index (with high components) and solid conformation traits. Batch daughters have a medium stature, with good udders and legs. They also have good health traits and score high for durability, which is not surprising in view of his enduring pedigree (Battlecry x Rocky).

The Glendridge Citation Roxy (EX 97) family, which features in Bento PP's dam's line, is a well-known name in international breeding circles. You can come across the very best cows from this line all over the world where they never fail to score high for traits including conformation. Bento PP's maternal line boasts 12 generations of VG or EX cows. And among these 12 generations no fewer than eight rank excellent, including one with 96 and one with 97 points.
