Breed	100% BBL
Date of birth	2020-04-13
Gest. length days	273
Gestation length	91
Calving ease	134
Straw colour	Turquoise *

Bobo van de Graashook is the first Bruno son to be used by K.I. SAMEN. Bobo is a well-developed bull, who was calved easily and, like Bruno, after a short gestation time.

Bobo numbers various well-known names in his pedigree, such as Bruno, Dorus and David in the paternal line and Ugo and Lucas in his dam's family. K.I. SAMEN has successfully tested three bulls produced by Bob's grand dam: Dino, Alfons and Shaun. The trait of a short gestation length and his powerful appearance make Bobo an extremely welcome addition to our beef on dairy portfolio.

Bobo is expected to produce very lightweight calves. All three of his uncles give a shorter than average gestation time. This means that Bobo merits 5 stars for calving ease and will probably also pass on an even shorter gestation time.
