Broeks Vladimir rc (Pp) (Powerball x Effect x Snowman) is a fairly well-developed bull with a 100% North American lineage that will add lots of new bloodlines, especially for the red Holstein population. Vladimir has the red factor in addition to the polled gene (50% of this offspring are born without horns). To make the story even more impressive: his maternal line (the known Glen Drummon S-line) is reputed to be one of the more successful cow families of North America (certainly when it comes to bulls, with bulls such as Selayo and Colombo rc).

Vladimir's sire, Powerball, is one of the top bulls in the world for the polled gene. He is used fully as a bull sire and his sons can be found at the top in many countries. Powerball has an well built up production index (plenty of milk and a plus for protein) and combines this with good conformation (he scores well for especially development and udders). In addition, he has high figures for udder health, fertility and durability.

The maternal line of Vladimir (the S-line) is nothing short of impressive. Excellent production levels and sky high conformation (12 generations of VG or EX) can be found within the maternal line of Vladimir. A large number of cows from this tribe have been very successful in delivering...
