| Date of birth | 2021-04-04 |
| Gest. length days | 267 |
| Gestation length | 86 |
| Calving ease | 138 |
| Straw colour | Red |

Brutus van de Graashook descends from the same maternal line as Bobo and was also sired by Bruno. Bobo is the first Bruno son to score very good breeding values for calving ease and gestation time.

Brutus numbers various well-known names in his pedigree, such as Bruno, Dorus and David in the paternal line and Lucas in his dam's family. K.I. SAMEN has successfully tested three bulls produced by Brutus' dam: Dino, Alfons and Shaun. With the other two Bruno sons from this cow family, Bobo and Beer, Brutus also has a very good chance of becoming an ideal beef on dairy bull.

Just like his proven relatives, Brutus is expected to produce very lightweight calves, born after what will probably be an even shorter gestation time. This means that Brutus merits 5 stars for calving ease and will probably also pass on an even shorter gestation time.
