Robustness and reliability play a major role in the pedigree of Creyland Varys (Finder x Gibor x Stilist) - a well-developed, powerfully built bull. The bulls in his bloodline are all animals with hundreds to thousands of lactating daughters whose strong traits include legs and high scores for durability and protein. This is precisely what we find in Varys' maternal pedigree too.

Varys's sire, Bouw Finder, is unbeatable in his component transmission ability. This calving ease bull scores well for frames, but where he really excels is udders (firm attachment and compact) and legs. He also notes very good scores for somatic cell count, fertility and durability.

This durability trait has also been embedded in Varys' maternal line for several generations. The latest three generations of these Veentjes have all produced more than 70,000 kg of milk (all combined with an average protein percentage higher than 3.60%). Veentje 168, Varys' dam, is still in excellent health and on her way to reach the magic milestone of 100,000 kg of milk (she has already produced more than 96,0000 kg). The Veentjes' ability to regularly achieve such high lifetime production is thanks to a combination of very a good production index and their conformation. Veentje cows are of average size, have good...
