Herdbook number	NL 422327004	Gestation length	281
A.I.-code	36658	Kappa Casein	BB
aAa code	243	Beta Casein	A1/A2
colour	RB	Cow family	
Breed	100% MRIJ	Straw colour	Orange

The well developed, stretched out bull Daat 219's Paulus (Parom x Ajax 115 x Peter) is a MRIJ bull with extremes in his pedigree. Sire Parom excels in its frame quality and his dam line (the family of proven bull Matthijs) is very strong in udders and feet & legs. As well sire- as damline have super protein percentages.

Paulus's sire Parom combines a high protein percentage with a negative fat percentage. This results in a very nice proportion fat /protein percentages with an improvement of the (kg or pounds) milk. Also improves Parom in frames, Parom-daughters are tall, long, wide and have good muscularity.

Paulus's dam line, the Daatje-family, are average of stature, have nice udders and his feet & legs are of a good level with very good longevity. Dam Daat 219 (VG 85) and great granddam Daat 133 (VG 87) became more than 10 years old. Daat 219 is still alive and appears to be a great breeding-cow. Her 2 milk giving daughters, Daat 251 (VG 87) and Daat 272 (VG 85) confirm this and for sure her proven son Matthijs! Manuel 214-son Matthijs belongs at the moment to the top bulls of the MRIJ population. He inherits a great improvement on conformation- and production-traits; on production kg (pounds) milk, fat and protein, on conformation udders and feet & legs.
