Breed	87% VRB / 12% BBL
Date of birth	2010-03-22
Gest. length days	
Gestation length	96
Calving ease	124
Straw colour	Turquoise *

Dario van Pesaken is a beautiful red-coloured speckled Roodbont with speckled legs, and is the combination of Dagobert x Burg's Billy.

Dagobert's father, Dario, is often best known for what he imprints on his offspring. He passes on a good frame and weight. As a newborn calf, he had a natural birth, without outside help. He has now developed into one of the largest bulls of the Verbeterd Roodbont breed. Measuring 1,50 at the shoulders and with a classification for the following scores: Physique -93, Type -93, Musculature -89, Feet & Legs – 92,and General Appearance -92.

Dagobert's dam is an award-winning matriarch. Tress has calved 7 times, of which 4 time were without the intervention of the breeder or veterinarian. She has a net weight of over 500 kg. Burg's Billy, the maternal sire, owes his name to his enormous haunches (*in Dutch: bil*) and was a huge bull with a live weight of about 1,300 kg. Billy is also the sire of the coveted Verbeterd Roodbont bull Romeo van Pesaken, whose stock of frozen semen sold out quite quickly. Romeo put on a carcass mass of 842 kg. Both the mother of Burg's Billy and the mother of Dario, Marga van Pesaken, have twice calved without any help. Marga is registered with 87 points.

Dario is a promising VRB bull from the Van Pesaken livestock....
