High component percentages, great udders, A2/A2 and polled just about sum up the Red Holstein bull De Blanke Biele Resandor (Pp) (Sander x Malando x Ideal). This well developed, powerful bull also offers a recently discovered cow family in his maternal line that is performing ahead of the herd in all respects.

Resandor inherited the polled gene from his sire Sander P. This bull, with a slightly out of the ordinary lineage, has a faultless transmission pattern. The traits he passes on for milk, fat and protein content amply tick all the boxes. As far as conformation goes, he produces the ideal cow for free stall barns: medium-framed, broad and with a good udder (with slightly longer teats) and good legs. The picture is completed by very good scores for somatic cell count and fertility.

We occasionally come across a new cow family that is performing remarkably well on a farm. Resandor's maternal pedigree, the Desiree line, is a typical example that stands out from the crowd. The Desiree line equates to good lactation values, high protein contents and very good conformation including super udders. And while on the subject of conformation, Resandor's dam descends from four generations of VG cows who scored 87 points or higher. The cow who noted the highest lifetime production in...
