A.I.-code	57159	Kappa Casein	
aAa code		Beta Casein	
colour	RB	Cow family	
Breed		Straw colour	Orange

Diepenhoek John Wayne is the first Texas Longhorn bull born in Europe and registered as an A.I bull in the American studbook for Texas Longhorns. All calves that will be born in Europe in the future can be fully registered with ITLA and/or TLBAA. Diepenhoek John Wayne has a completely American pedigree, which includes the best animals of his breed. Diepenhoek John Wayne has a deep red coat peppered with many small white spots over his body. This is called “Red and White spotted". He has a very correct build and extremely impressive horn growth. He was the first bull in Europe to reach the milestone of 70 inches T2T. He passes on beautifully thick twisted horns. His calves have very nicely marked coats with lots of specks and spots.

He was sired by Tempter. See https://www.youtube.com/watch?v=3OgSNMQZtrI for more information about his pedigree, horn growth and offspring. It's great to see how the coat of this little bull has changed colour over time, and how his horns have developed.

His dam is Fickle Miss. She was one of the most popular cows in the USA whose embryos were sold. John Wayne will deliver the traits that Texas Longhorns are praised for; passing on thick, twisted long horns and descendants of various colours.
