Dz Alzonn Thijmen (Matthijs x Mark 44 x Bob 4) is a dairy character MRIJ bull with very good feet & legs. In his pedigree we find several generations of top bulls in a row. For example Matthijs and Mark 44, two bulls who inherit high protein and very good conformation and who know a great longevity score and high NVI. Combined with a dam line having four generations of VG cows delivers Thijmen a strong base.

Matthijs, sire of Tijmen, is when we look at his inheritance pattern a bull that can be used easily. His production figures are very good (lots of milk and positive protein%) and his conformation is also superior. On top of this he knows great somatic cell scores and an average fertility score resulting in a high longevity.

The dam line of Thijmen is a line with cows that are relatively easy to combine with. This Mies family is known for top allround cows. They possess great conformation (four generations VG cows), high productions and fine protein percentages. The late maturing Mies family excels in feet & legs and also the udders are of a good quality. Besides this the cows are rather prevailing, this results in great longevity and very high lifetime productions. Brooding cow in this family is Mies 70, a VG 85 points Berend daughter. Mies 70 is the great great granddam of...
