5.10 305d 10826kg 4.12% 3.53% (vsp)

Normally the Lineback population cannot compete with purebred Holsteins when it comes to production and conformation. However, in the shape of Erfgooier Dirk (Pp) rf (Dubai PP x Handy P x Potter P), a Lineback bull with the ability to certainly equal Holsteins for protein has stepped into the ring. He boasts several generations of bulls with a plus for protein in his pedigree and the cows in his maternal line also excel for protein. Dirk (Pp) rf also carries the red factor which makes him a welcome addition to both the black-and-white and red-and-white segments. Other traits that undoubtedly speak in his favour are the fact that he is heterozygous polled and has the A2A2 gene for beta-casein.

Dubai PP, the sire of Dirk (Pp) rf, is a homozygous, polled red-and-white bull with very all-round transmitting abilities. He passes on good milk production combined with super component percentages, as well as conformation that is practically flawless. The udders are the strongest component: firmly attached and compact with slightly longer teats. This all makes Dubai PP ideal as a calving ease bull for maiden heifers.

The maternal line of Dirk (Pp) rf is a cow family where high lifetime production is standard. One of the contributing traits is this line's exceedingly good fertility....
