Breed	100% HF		

It's not often you come across an unbroken line of 17 generations of excellent cows - a feat that can justifiably be labelled unique. The maternal line of Fourdianmondb Royal Rex-ET (Jabir x Shottle x Pronto) is one of the rare cow families that can make this claim to fame. The line up in the youngest generation features names like Shottle, Pronto, Allen, Stormatic, Linjet and Rudolph - all bulls with reputation when it comes to conformation.

With a maternal line that excels for its high quality conformation, the best description of Jabir - the sire of Royal Rex- is an all-rounder. His transmits strong conformation (powerfully built daughters' with great udders and legs) who also perform well producing plenty of milk with good components. Where Jabir really shines as a bull for maiden heifers is in his scores for the health traits somatic cell count, fertility and durability. And last of all, Royal Rex is ranked with aAa code 561, So his progeny will not only be true of their type, but also offer a fine balance. A very important condition for a long, productive life.
