PRACTICAL PROVEN BREEDING

BULL INFORMATION

Name	Frewin P	Date of birth	2019-01-17
Herdbook number	NL 931338229	Gestation length	282
A.I.-code	361195	Kappa Casein	AB
aAa code	243	Beta Casein	A2/A2
colour	RB	Cow family	Julia
Breed	100% HF	Straw colour	Green

If we mention successful cow families, then the Julia line owned by the Werler family in Vaassen simply cannot be overlooked. This pedigree, that traces back to the maternal line of Frewin P (Brekan x Lawn Boy x Stadel), is a consistent provider of new breeding bulls. One of the striking traits passed on by these bulls is correct udders. These bulls, who descend from Julia 388's branch of the pedigree (Frewin P's dam) usually pass on somewhat more curved legs (side view rear legs) and often carry the A2A2 beta casein gene and the polled gene. And these two traits are also in the skill set of the well-developed Frewin P.

Like his maternal line, the pedigree of this bull's sire Brekan also transmits a particularly strong udder trait. This German-bred breeding bull also offers virtually faultless conformation and outstanding milk production. His scores for somatic cell count, fertility, claw health and durability are also of a very high level, and thanks to his out of the ordinary bloodline, what we have here is a very balanced, complete bull.

To return to the Julias, who make up Frewin P's maternal pedigree. The foundation cow of this family is undoubtedly Julia 382, the grand dam of Frewin P. This cow - who scores 92 points and descends from an 86-point Beverlake Nick daughter...
