7.08 234LL 7523kg 4.68% 3.70%

Gladstone adds another bull from a valuable, new and as yet unused cow family to K.I. Samen's portfolio. His different paternal line to Rubicon, Goldfarm, Cupido, Shogun and Peinzer Boy makes him an extra interesting proposition.

A characteristic of the G family is extremely correct, strong cows that produce easily and without any problems. His dam Go-Black (s. Goldfarm) is currently on her fifth list and to date has lifetime production of approx. 50,000 kg with good components.

His second dam achieved a total of more than 60,000 kg in her lifetime while his third dam is still in production (currently 108,000kg). His fourth dam yielded 100,000 kg of milk with 10,000 kg of fat and protein.
