aAa code	132645	Cow family	Gloryland
colour	ZB	Straw colour	Transparent (Medium Straw)
Breed	100 % HF		

Cow families with a solid reputation are central to the KI SAMEN's selection policy. Gloryland Jaguar (Astro Jet x Sexation x Rudolph), a bull that lives in the USA, descends from one of the leading cow families in the world: the Roxy line. C Glenridge Citation Roxy is the absolute prototype of how a Holstein should look. She is one of the few cows in the world to be awarded 97 points for conformation and is described as the “Queen of the Breed". Roxy produced 16 excellent daughters and is the brood cow at the foundation of various pedigrees that excel in conformation all over the world. We come across Roxy in the seventh generation of Jaguar's line. Jaguar is supported by a total of eight generations of excellent cows, two of whom also merited 96 points. One of these 96-point cows is Jaguar’s dam Gloryland Lexie Rae.

Jaguar also has proven, conformation-rich genes on his sire’s side of the family. His sire Astro Jet has produced numerous champion cows over the years, with their beautiful frames contributing to the titles. Thanks to his slightly older pedigree, Astro Jet (like Jaguar’s dam's sire Sexation) is a nice alternative in today's genomics breeding landscape.
