Goliath is a highly impressive herd sire that ran with more than 60 females and continued to develop throughout that period He excels in stature, feet and legs, and body weight. As a herd sire, he already possessed tremendous mass, but he developed even further during his quarantine period. The first calves, born at the breeder's farm, show excellent size, length weight, and vitality. Thanks to his strong qualities, Goliath can be used broadly across a wide range of bloodlines.
