PFW code	B	Beta Casein	A1/A2
aAa code	351426	Cow family	Jane
colour	RB	Straw colour	Orange
Breed	100% HF		

With Groenibo Pressure P, K.I. Samen presents its first bull from the Jane cow family. This family originates from the Jaantjes line of Hilbrand Korver from Nederhorst den Berg. This very strong breeding cow family is known for hard working problem free and well balanced cows. Earlier bulls such as Reliever, Cornwall and Rambo PP already proved the quality of this family. When we look at the cows behind Pressure P, we see cows that have everything needed to grow old easily.

An important key cow in this line was Jane 90, who reached a lifetime production of 110,000 kg of milk. Before her we find Jane 62 with a lifetime production of 84,000 kg and her dam Jane 20 produced 66,000 kg of milk. From Jane 90 we continue via the Finder daughter Jane 181 to the Abundant offspring Jane 302. This outstanding well balanced Abundant daughter is now in her 4th lactation and again breeds exactly the qualities the cow family is known for: normally developed wider cows with very functional udders and excellent legs.

The dam of Pressure P unfortunately suffered udder damage but despite this she started her 2nd milk yield record in excellent health. With strong components and high LV values, she represents the next step in the future proof Jane line as the dam of Groenibo Pressure P with aAa 351.
