| Breed | 100% Fleckvieh | | |

Haiko (Hero x Weinfur x Humid) is an imposing, powerfully built Fleckvieh bull, from a famous cow family owned by the Lang family from Uffenheim in Germany. His aAa code of 465 represents added value for this breed. His pedigree contains many bulls known for their calving ease. Haiko's cow family, by paternal line, has breed the proven bulls Manigo, Bussard and Zepter.

His sire is Hero, a good Hurly son who is known for easy births and is therefore a good calving ease bull. In addition, Hero also transmits excellent udders and legs to his offspring. His good health traits are also a positive point, with udder health and fertility as stand out features.

His dam Shirley is a beautiful Fleckvieh cow. To date, she has realised impressive lactations with many kilos of milk with high component percentages. This Weinfur daughter is also classified as EX 90. Her current lifetime production suggests she is well on her way to reaching 100,000 kg of milk. Grand dam Shirley was also still active on the farm until recently, as proof of the good longevity in Haiko's maternal line.

The breeder describes the Shirley cow family as a line that produces high component percentages with great milk production as well as breeding champions!

In summary, Haiko is an interesting bull for the...
