Straw colour	

Red Xavier is a beautiful red Angus bull, who combines genetics from some of the major Angus breeding countries. He boasts American, Canadian and English blood. Progeny of Red Xavier will score well for beef traits but be mainly interesting for their maternal qualities. His daughters are extremely suitable for further breeding purposes and have very good qualities

Red Xavier has positive scores for muscularity of course, but this is not the area in which he excels. His main use will be to breed dams.
