aAa code	543	Beta Casein	A1/A2
colour	RB	Cow family	
Breed	87% MRIJ, 12% HF	Straw colour	Grey

Hexel P is a Harcon x Baco x Ewald out of Marijke 208 P, a cow that keeps increasing her milk production as she gets older. Her lifetime production already exceeds 50,000 kg of milk with over 4% protein.

Hexel P is unique within the MRIJ breed because he is polled. In addition, he has very good stature and dairy type. His udder traits are excellent, with high and wide rear udders and a strong fore udder attachment to the body wall, combined with correct teat placement.

He also has excellent legs with outstanding claw health. All this makes Hexel P unique in his kind. He is a bull you should not miss in your MRIJ herd.
