Name	HOR Stan P	Date of birth	2017-12-25
Herdbook number	DE 0539728941	Kappa Casein	AA
A.I.-code	361148	Beta Casein	A2/A2
aAa code	153	Cow family	Sunrise
colour	RB	Straw colour	orange
Breed	100% HF		

HOR Stan (Pp) (Lucky x Curtis x Bravisi) is a German bred, Red Holstein bull who boasts a varied, international array of bulls in his pedigree. He is a half-brother of Best Sun, a bull who has already been offered by K.I. SAMEN. With the exception of grand sire Curtis, they are also all bulls with a completely different bloodline for the red-and-white segment. Given his maternal and paternal pedigrees, Stan will input a considerable boost to both production and conformation. Moreover, thanks to his polled gene, 50% of his offspring will be born hornless. And, with an aAa code of 153 and A2A2 for beta-casein, Stan has even more interesting traits.

Stan's sire Lucky PP has passed on the polled gene to Stan and contributed to the A2A2 for beta-casein. This Jax son is homozygous polled and a perfect bull for calving ease. He transmits impeccable production and conformation traits, with standout udders.

In Stan's maternal line, we have discovered an impressive cow family. The cows from this S-line come to the fore on the Horstick farm in each successive generation. They stand out not just for their impressive production figures, but also for their solid, and often very attractive, conformation. The best example of this is probably Sunrise (VG 89), the dam of Stan. Sunrise descends...
