PFW code	B	Beta Casein	A1/A2
aAa code	516	Cow family	
colour	RB	Straw colour	Paars
Breed	100 % HF		

Horst Ritchy Red is a very welcome addition to the testing programme for red-and-white bulls at K.I Samen. He should make an interesting future bull thanks to the cow family he descends from and his own credentials. The Liza family is no stranger to the herd improvement world, having already produced breeding bulls like Pascal and Allard rf. And these two bulls also had a half-sister, Liza 211, who has been awarded star cow status and is now also a bull dam. In her current lactation, she yielded more than 100,000 kg of milk. This dependable, extremely well balanced Award daughter still has an imposing and well preserved udder. Ritchy Red inherited his traits of width, fineness and strong legs straight from his dam.
