colour	EW
Breed	100% BBL
Date of birth	2018-03-04
Gest. length days	285
Gestation length	95
Calving ease	132
Straw colour	Transparent

Jaap 2 van de Plashoeve is a son of one of the famous beef on dairy bulls, Jaap van de Phaenocryst. Jaap 2's sire had a very short gestation of 93 days and offered the certainty of calving ease thanks to his score of 118. Calves sired by Jaap van de Phaenocryst stood out in a positive sense for their development and weight.

Jaap 2's maternal line is the well-known and now celebrated cow family Elke van de Plashoeve. This line has already produced a large number of bulls that have been tested for beef on dairy use. Jaap 2 shares his grand dam with another illustrious name: Dorus van de Plashoeve. Although Jaap 2 has a slightly longer gestation length, we are still positive about his chances.

The combination of this pedigree with Jaap van Phaenocryst has resulted in a fine bull, who we expect to produce good calves and light, easy births. Jaap 2 scores 4.5 out of 5 stars for calving ease.
