PRACTICAL PROVEN BREEDING

BULL INFORMATION

Name	Jabideck Red	Date of birth	2022-04-22
Herdbook number	NL 589108333	Gestation length	279
A.I.-code	361303	Kappa Casein	AB
PFW code	D	Beta Casein	A2/A2
aAa code	246	Cow family	Aukje
colour	RB	Straw colour	Green
Breed	100% HF		

Jabideck (Jabido x Adorable x Kian) descends from a cow family not previously used by K.I. Samen. This Aukje family has a good urge to produce (including good components), good fertility and very good durability. Jabideck's grand dam Aukje 130 is a cow that exemplifies all these traits. For generations, she combined an enormous capacity for milk production with extremely good fertility, which resulted in lifetime production in excess of 95,000 kg achieved in seven lactations (averaging more than 36 kg of milk per day). And, in turn, her Trevor dam Aukje 119 also achieved very respectable lifetime production of almost 65,000 kg of milk. Topping this in the production stakes is Jabideck's dam Aukje 197. The Adorable daughter scored a lactation value of 115 as a heifer, a lactation value of 117 as a second calver and increased her score to 132 on her third calf! Until now she has noted production above 40 kg of milk per day, with more than 3.70% protein.

Jabideck can also boast benefits to milk production in his paternal line too. His sire Jabido is known to significantly boost milk production and improve the component percentages. For frame, he scores better for width than for stature, but has good scores for all the other conformation traits.
