

*Alger Meekma*

Breeder: Dhr. J. Kolff, Woudrichem

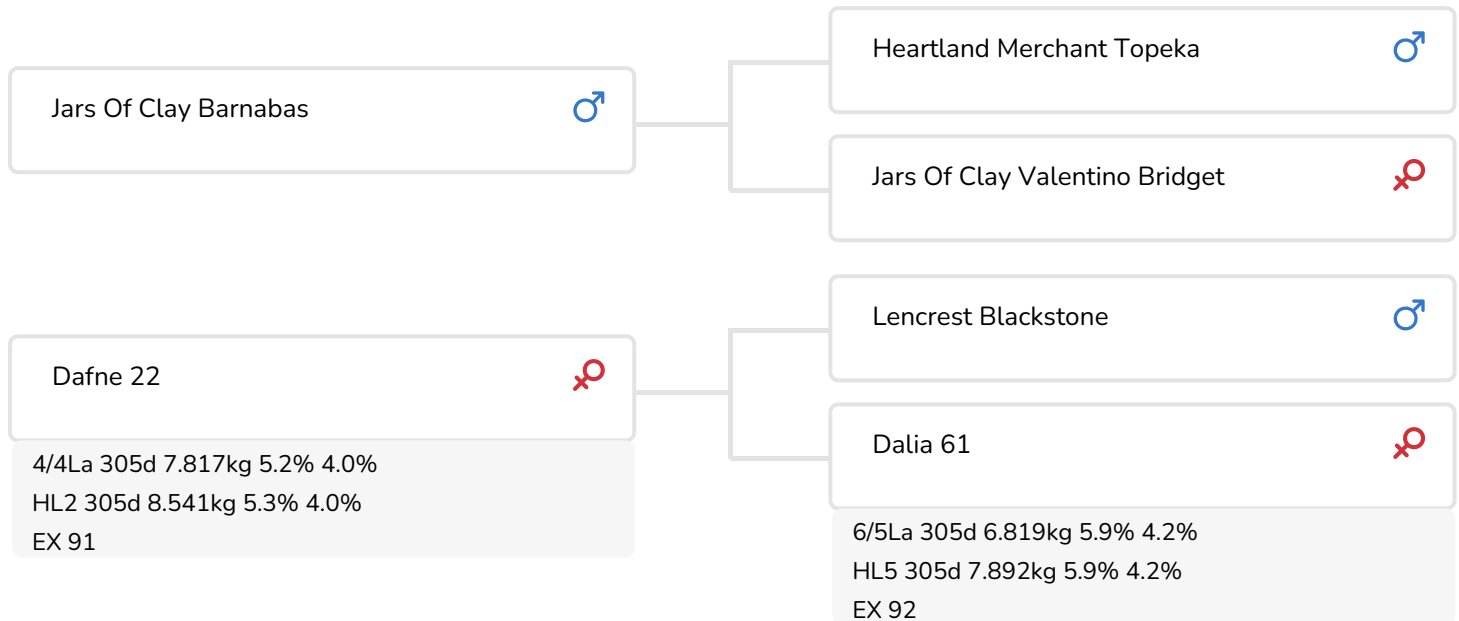

- + Combination of Danish and American genetics
- + All sires in the pedigree are breeding bulls
- + Sired by Barnabas: a conformation specialist
- + Three successive generations of excellent cows in his pedigree
- + Super lifetime production with good component percentages
- + Kappa casein BB and beta casein A2A2

Dafne 22 (EX 91) (dam of Berry)

## BULL INFORMATION

Name	JK Eder Berry	Date of birth	2019-09-01
Herdbook number	NL 627396881	Gestation length	292
A.I.-code	361208	Kappa Casein	BB
aAa code	345	Beta Casein	A2/A2
colour	EB	Cow family	D-familie
Breed	100% Jersey	Straw colour	Groen

Combining Jersey genetics from Denmark and the USA has resulted in the super conformation and high component percentages evident in Berry (Barnabas x Blackstone x Zik). Berry, who carries the favourable protein variants A2/A2 and BB, also has a pedigree that consists purely of breeding bulls with extremely reliable transmission scores.

One of these reliable breeding bulls is the American Barnabas, Berry's sire. Barnabas has already been active as a breeding bull for some time and can be reckoned on to make a very positive contribution to his offsprings' conformation. As well as good udders – especially the rear udders – he shines in great legs with good hoof health. In terms of production, he gives average milk production combined with high components.

These high component percentages are also found in Berry's maternal line. For at least four generations, the fat percentages of these cows have varied between 5.2% and 6.2% with protein between 4.0% and 4.7%. Exemplary conformation is also embedded in the genes of this cow family as demonstrated by three generations of excellent cows. The lovely conformation of these animals can be regularly admired at various cattle shows in Germany. And they also bring home the silver! One of the accolades awarded to Berry's great grand dam...
