colour	EW
Breed	100% BBL
Date of birth	2016-04-08
Gest. length days	283
Gestation length	96
Calving ease	116
Straw colour	Transparent

Joep van de Plashoeve is a bull that has joined K.I. SAMEN's portfolio. He has just received his first figures for calving and the indications are that he will produce more muscular calves than bulls like Bruno, Dorus and Menno van de Plashoeve. Van de Plashoeve is a respected name in the world of beef on dairy and nearly all their bulls score well.

As a son of Abel van de Schriek out of Gitan, Joep will produce calves with more muscularity. His rankings are expected to improve, and his calves will show more muscularity. The gestation time he passes on is shorter than average, which is a very welcome sign with bulls used in beef on dairy crosses. We rate Joep with 3.5 stars for maternal ease of calving. The rating for ease of calving may be amended as more information becomes available. Joep produces vital calves.
