PRACTICAL PROVEN BREEDING

BULL INFORMATION

Name	Junior PP
Herdbook number	FR 8758731067
A.I.-code	783649
colour	EB
Breed	100% LIM
Date of birth	2014-04-20
Gest. length days	
Gestation length	
Calving ease	
Straw colour	Pink

Junior (PP) is a homozygous Limousin bull, who combines great length with an amazing set of legs. He was bred by Scea de Nouailhas in Vicq sur Breuilh, France.
He was sired by Jost, a German heterozygous Limousin bull out of an excellent ranked Clovis dam. His great grand sire is the famous Romario.

His dam Gonzesse scores 106 for milk and 108 for calving ease. The grand dam of Junior (PP); Vaucloise, is one of the top performers at De Nouailhas.

Junior (PP) weighed 39 kg at birth and at 120 days weighed 194 kg, with a weight of 337 kg at 210 days. Junior (PP) promises to be an ideal bull for pure breeding purposes and potentially for beef on dairy. He is not recommended for use as a calving ease bull.
