

Anna Joosse

- + From the Lila Z (EX 94) family
- + Red factor carrier
- + Homozygous polled
- + Kappa casein BB
- + Beta casein A2A2

Name	Lando Z PP RF	Date of birth	2018-09-11
Herdbook number	CH 120145251678	Kappa Casein	BB
A.I.-code	783462	Beta Casein	A2/A2
aAa code	234	Cow family	Lila Z
colour	ZB	Straw colour	transparent
Breed	100% HF		

Lando Z (PP) rf (Powerful x Eraser x Doberman) is a bull based in Switzerland who offers a wide range of desirable traits. First of all, his maternal line, consisting of the imposing Lila Z family. He is also a red factor carrier, has the A2A2 variant for beta-casein, the BB variant for kappa-casein and the homozygous polled gene (all his offspring are born polled).

His sire Powerful is also a homozygous polled bull. Breeding bull Powerful passes on plenty of milk partnered with positive protein percentages. His daughters have lovely frames, slightly more curved legs and correct udders (firm, high attachment). The health traits all score extremely well.

Lando (PP) rf's component-rich maternal line has its roots in the USA. The cows from this family have very good conformation, which is not immediately reflected in the scores awarded to the last generations (these cows were rated according to the very strict Swiss classification system). The most famous cow in this line is the legendary Lylehaven Lila Z (EX 94) who is found in the sixth generation of Lando's pedigree. Her dam and grand dam also merited 94 points. The excellent Lila Z was sold at the time for over \$1 million and produced more than 100 daughters and sons.
