A.I.-code	82686	Kappa Casein	AB
aAa code	345	Beta Casein	A1/A1
colour	RB	Cow family	Pieta
Breed	100% MRIJ	Straw colour	Wit

The complete dark-red Landschot 3249 (Diman x Mark 44 x Tonny's Ajax) is a bull with a high protein en solid conformation pedigree. Most striking however is the lineup of three MRIJ top-bulls in his pedigree (high protein bulls), Diman, Mark 44 and Tonny's Ajax.

Diman, sire of Landschot 3249, is an absolute star in the improvement of the fat and protein percentage. His protein inheritance together with his good conformation delivers Diman a profile which brings him to a high position on the Dutch MRIJ rankings. Diman daughters are moderately sized and show good udders and very good feet & legs. Besides this Diman scores magnificent for udder health (SCS) and daughter fertility and does his progeny remain significantly longer on the dairy farms than average.

An excellent longevity is also found in Landschot's dam line, the Pieta's. As well granddam as great granddam as GGGD realized at least six lactations! These lactations became even more interesting due to the sky high solids. Pieta 12, dam of Landschot 3249, isn't that far yet. This fourth calf cow is even more productive compared with the older generations of this line. What all these cows have in common is a very good temperament and impressive fertility. All together a real no-nonsense cow family!
