aAa code	351	Beta Casein	A1/A2
colour	RB	Cow family	
Breed	100% MRIJ	Straw colour	Pistachegroen

Langemaat 310 (Langemaat 268 x Robin x Piet 225) is well developed, long MRIJ bull with conformation and protein percentage in his pedigree. Also a fact is that Langemaat 310 comes from the same farm, only different families.

The sire Langemaat 268 origins from the Dolphine-family. Dam Dolphine 55 is also dam of the popular MRIJ bull Langemaat 213. Both bulls have several similarities in which they excel. Both score good for protein percentage and have striking good frames. Also the scores for udder and feet & legs and longevity are high.

For conformation (and frames) the dam of Langemaat 310 reached to the score excellent. What to think of 5 generations of VG or EX cows in a row (granddam and great granddam are both registered with EX 90 points)! However, it's not only conformation where this Rita-family scores good results. Also score dam, granddam and great granddam good in all their production lactations – lactation values between the 100 and 130. Recently Langemaat 294 (a half brother of Rita 351, the dam of Langemaat 310) came through with very good figures.
