aAa code	423	Beta Casein	A1/A2
colour	AR	Cow family	Danielle
Breed	100% MRIJ	Straw colour	Pink

Once in a while K.I. SAMEN is presenting a new lineback bull. Usually this is a bull with a Holstein pedigree. With Lingehoeve Henri K.I. SAMEN adds a lineback bull to their portfolio with a 100% MRIJ pedigree!

Henri's sire, Ulkjes Manuel, is a Manuel 53 son who received his lineback drawing via his maternal site. Ulkjes Manuel is a 100% MRIJ bull with an average production profile (esp. positive protein%) en solid conformation. On this conformation site are especially the good feet & legs, great front teat placement and central ligament worthwhile to mention.

The dam line of Henri origins from the famous MRIJ breeder Andre Vink in Groot Ammers. One of the better and well known cow families is the Danielle family, who also bred proven bull Daniel van de Vinkenhof. Also Henri descends from this line and knows with Danielle 28 and Danielle 14 two solid, with good muscularity and high protein MRIJ cows as dam and granddam. A full sister of Henri is at the moment a young heifer with a very good frame and very good feet & legs. Henri's first progeny are strong, healthy calves with a good and meaty appearance.
