A.I.-code	361001	Beta Casein	A1/A2
aAa code	435	Cow family	
colour	RB	Straw colour	Brown
Breed	100% FLV		

Mandfred is the first Fleckvieh bull, who has earned a place at K.I. SAMEN at the K.I. station. This bull is an impressive example of more capacity and muscling as a result of having BFG Masseur as his sire. Added to that comes very good inheritance percentages and the somewhat less milk that BFG Masseur tends to have.

The dam of Manfred, no. 661, is a very productive cow with very high percentages. She is strong as a result of her strong, productive sire and equally good producing dam.

With Manfred K.I. SAMEN wants to offer the farmer a choice for a thorough-bred bull, with the expectation that it will improve all production characteristics. Additionally, the bull is free from hereditary diseases. Manfred is a good choice for people who wish to make a thoroughbred choice by using Fleckvieh. We do not advise using him for calving ease at the moment given the pedigree. First, we need to know more about the results in practice before being able to do that.
