PFW code	C	Beta Casein	A2/A2
aAa code	243	Cow family	Caudomer Lol
colour	RB	Straw colour	Dark Green *
Breed	100% HF		

With Mantana Red PP, a new homozygous polled bull is now available. He descends from a branch of the well-known Dutch Caudomer Lol cow family, developed over four generations in East Frisia (DE). The foundation cow of this German branch is the Kansas P daughter Lilli, who recently calved for the eighth time and has already achieved a lifetime production of over 80,000 kg milk.

In the following generations we find daughters of Abi-Red and Solitar P, before arriving at Luisa (s. Sandro P), the dam of Mantana PP. She is a youthful, very well-balanced cow. On a farm with a grass-based ration, she achieves a solid milk production with excellent components, especially in protein. The same applies to many other family members in the herd. The fact that all four generations before Mantana Red PP are still in production highlights the quality of this family!

Besides being polled, Mantana PP offers a low somatic cell count, good fertility, high milk production, and an ideal milking speed.
