Gestation length	
Calving ease	
Straw colour	Groen

TRIMIX EASY 2

Good calving ease and a higher conception rate!

Bob van de Plashoeve, Elancher van de Simonsohoek, Menno van de Plashoeve

Mixing semen from these three similar bulls creates competition between the sperm cells, which increases the chances of conception. In addition to the higher conception rate (greater certainty of +3-4%), the combination focuses specifically on good calving ease.
