PFW code	C	Beta Casein	A2/A2
aAa code	432	Cow family	Johanna
colour	RB	Straw colour	Orange
Breed	100 % HF		

Good production, high longevity, super conformation and outcross; traits that are music to your ears. Niemeijers Rolling Stone Red (Ryder x Agent x Malando) lives up to his name. In addition, powerfully built Rolling Stone Red is the product of a new line from a cow family that has never previously supplied a bull to an AI organisation.

The cow family in question is the Johanna line: one that is showing considerable growth in the herd. An important contributing factor is the durability of the Johanna cows, which means they produce a higher than average number of progeny. We have not often tested a bull who has three generations of his maternal line on a farm. Rolling Stone Red's dam, grand dam and great grand dam are still all active - and very healthy - members of the herd. The milk production of his third dam Johanna 18 (EX 90) now totals 115,000 kg of milk with an average of 5.16% fat and 3.81% protein. This EX ranked Jorden daughter has also smashed the barrier of 10,000 kg of fat and protein. Johanna 18 is not only pleasing to see - she took home the title of champion at the cattle show in Espelo and has been shown at the NRM - she also excels as a brood cow. At least six of her daughters are being milked, including Pleasure daughter Johanna 27 with lifetime production to...
