Parfait P stands out from the crowd with his jet-black coat, extremely stylish appearance and alternative bloodline. His uncommon pedigree of Prada x Malki x Miller P, combined with his aAa code 261, makes Parfait P a unique polled bull.

The Geertje family of the Hammink family is known for producing true “stayers.” No fewer than 14 Geertjes have surpassed the 100,000 kg milk barrier, and 6 of them also exceeded 10,000 kg fat and protein combined. Parfait P’s dam, Geertje 752, is an extremely correct young cow that has just started her productive 3rd lactation. One generation further back, Geertje 712 P — the source of the polled gene within this line — will soon begin her 5th lactation, while another generation back we find 100,000 kg cow Geertje 542.
