aAa code		Cow family	
colour	RB	Straw colour	Pistachio Green
Breed	100% MON		

K.I. SAMEN can add another unique offering to its portfolio in the shape of Pejy. Pejy is a son of the National Champion 2021 for Montbelarde cattle. Pejy is a harmoniously built bull with good dairy type and plenty of length. He also has great locomotion on correct legs.

Pejy's dam is the famous Hollywood, a cow with an amazing udder. In addition to her many other show victories, she won the titles of national and prestige champion of France. Her silverware is too numerous to mention individually, but the photos speak for themselves. She is also highly productive with an average over six milk recording lists of 11354 kg milk with 3.51 fat and 3.36 protein in 302 days. She is also very fertile and has calved every year. His grand dam has an average over eight milk recording lists in 305 days of 11106 kg with 3.57 and 3.34 protein. She, too, is a fine illustration of super longevity. Pejy descends from a proven cow family that excels in production and conformation.

His sire Fusionnel is known to breed more dairy strength, boost the components and contributes to good udders and an above-average milking speed.

Our French partner advises using Pejy to improve udders, add more components, dairy strength and stature. He is also suitable as a calving ease bull.
