Ragtime PP is a homozygous polled Limousin bull that truly stands out. Ragtime PP is a son of Sokrates PP out of a Hinz PP dam and weighed 42 kilos at birth. Based on his pedigree and his birth weight we expect calving ease. He carries two different myostatin genes, F94L and NT821, which contribute to his excellent muscularity. In addition, the bull has a good temperament and very good legs. The first calves show a lot of quality. Ragtime PP was bred by Richard Thomas in France.
