A.I.-code	36726	Kappa Casein	AA
aAa code	345	Beta Casein	A2/A2
colour	RB	Cow family	Gonda
Breed	100% MRIJ	Straw colour	Grey

The MRIJ bull Ramon (Robel x Timon x Man. 183) is a well developed, typical bull out one of the best cow families of Mts Ten Damme, the Gonda-family. Very good conformation, longevity and good productions can be found in the pedigree of Ramon.

Ramon's sire, Robel, is a bull known for his milk. This in Germany bred Roel-son combines this with strong conformation and good management traits. The Robel-daughters are also known as cows with a fine temperament.

The Gonda-family, Ramon's dam line, is known for the super conformation (VG 85 x EX 90 x EX 86) in combination with high productions. The average lactation values of dam Gonda 321, granddam Gonda 277 and great granddam Gonda 231 are 116, 119 and 116. Granddam Gonda 277 produced already more than 60.000 kg (1320.000 pounds) milk and great granddam Gonda 232 more than 80.000 kg (175.000 pounds). Besides is this family also successful in delivering proven bulls. One of the best MRIJ-bulls at the moment is the bull Meddo, a full brother of Gonda 277 (the granddam of Ramon). Whether Gonda 277 itself will be a successful dam, we will notice in the future! Her daughter Gonda 321 (the dam of Ramon) has several good full sisters and half sisters. One of them are Gonda 325 (VG 87, s. Mark 44) and Gonda 297 (VG 87, s. Robel).
