

Alger Meekma

Breeder: Melkveebedrijf Wesselink VOF, Wezup

- ✚ Outcross
- ✚ Impressive production index, plenty of kg of fat and protein!
- ✚ All-round and faultless conformation
- ✚ Good health traits and longevity
- ✚ Beta casein A2/A2

Red Rocks Massia 155 (VG 86)
 (dam of Celebration)
 Owner: Melkveebedrijf Wesselink VOF, Beilen

BULL INFORMATION

Name	Red Rocks Celebration	Date of birth	2019-03-21
Herdbook number	NL 562674305	Gestation length	278
A.I.-code	361190	Kappa Casein	AB
PFW code	C	Beta Casein	A2/A2
aAa code	432561	Cow family	Massia
colour	RB	Straw colour	Beige
Breed	100% HF		

The best way to describe Red Rocks Celebration (Japan x Wisent x Sunfish) is as a bull who offers it all! To start with, Celebration himself has impressive, impeccable conformation. He can also trace his origins to the widely branched and now successful Massia line. And his "uncommon" lineage is certainly worth mentioning. With three successive generations of bulls that carry the red factor, and further back in the pedigree bulls such as Emerald and Mascol, black-and-white genes almost predominate. Another added bonus that Celebration brings is A2A2 for beta casein.

Celebration's sire Japan Rf is one of the red factor carriers mentioned above. With Brentano as his sire and Malcolm (red factor) as his maternal sire, he even has two black-and-white sons in the last generations. Calves produced by Japan Rf are average to lightweight at birth. Japan also gives average stature with very good udders and legs. You can also rely on him for great udder health, fertility and durability. His best trait is perhaps his production heritability: milk in abundance with a small plus for protein.

While on the subject of production and protein, Celebration's maternal line excels in that department. The first milk yield list of Celebration's dam Massia 155 (VG 86) is predicted to reach more than...
