Libo P is a heterozygous polled bull from a lesser-known branch of the Massia family. This Coke/Coco line arrived in Germany via embryos and was later expanded in the Netherlands through the purchase of Wilder Coke Rdc, a full sister to the German sire Born P (also found in the pedigree of KI Samen sire Abraxas P Red). Coke's daughter, Coke P Red, is the grandmother of Libo P. This Moscato P daughter (classified VG 88) produced 50,000 kg with 5.37% fat and 4.04% protein! Her daughter by Jopper P (Libo P's dam) also stands out with impressive components and strong conformation. This 3rd lactation cow, also classified VG 88, has already produced 30,000 kg with 5.12% fat and 3.93% protein.
