A.I.-code	361253	Beta Casein	A2/A2
aAa code	435	Cow family	Dea
colour	RB	Straw colour	Oranje
Breed	100% MRIJ		

Rintje is a well developed MRIJ bull with lots of power and capacity. He was bred by Otto Theisen from the Eiffel (Germany).

Rintje's sire, Roest DN is a large, well developed bull with enormous capacity.

Dea's family is known for its very good conformation. Dea's great grand dam, VG with a score of 87 points, has completed seven milk recording lists. Taken as an average of these lists, she produced 7467 kg of milk with 4.47% fat and 3.7% protein. Another daughter of his great grand dam merited 4 x 91 points and reached an age of more than 10 years. Rintje's dam, Dea (EX 90) is a truly impressive cow, whose wonderful conformation immediately catches the eye. She also produces plenty of milk with high component percentages on a grass ration. Two of her daughters are currently lactating at Otto Theisen's farm and both are performing to his full satisfaction.

Dea is a beautiful cow, who produces very easily in the tie stall system, and would make an impression on every farm. She is a worthy flagship of breeding who can reach an old age. Rintje also offers A2A2 and therefore makes a very welcome addition to the MRIJ breeding segment.
