Roady rf (Red Max x Bart x Pleasure) brings another interesting proposition to. K.I. SAMEN's portfolio of Lineback bulls. As well as his wonderful Lineback markings, Roady rf offers a wide range of very desirable traits including A2A2 for beta-casein, an aAa code of 156 and he carries the red factor. Roady rf has inherited good durability and super conformation from the pedigrees of both his parents.

Red Max, the sire of Roady rf, has an aAa code of 165 and has the A2A2 gene for beta-casein. He is the result of a good corrective match that has created a perfect combination of dairy type and balance. His full sister, Gerda 64, provides extra proof of this successful mating. Gerda 64 has enjoyed many successes in the show ring and was classified with 92 points for her fabulous conformation. The line also includes some very correct young stock that descends from Red Max.

The Mathilde family (Roady's maternal line) owned by the Ammerlaan family from Schipluiden is a familiar supplier of Lineback bulls to K.I. SAMEN (he was preceded by the bulls Leo and Murphy). For generations the Lineback colouration has been embedded in this cow family, and for generations too the cows from this line have shown remarkable longevity. Before Mathilde 77, the grand dam of Roady rf, seven generations...
