Rødding Svend is the first Jersey bull at the K.I. SAMEN barns. This is for first time in the more than 30-year history of K.I. SAMEN. The first K.I. SAMEN bull officially recognised was Grashoek Galm, who at the time yielded very good results and we certainly hope that Svend will do the same.

Svend's sire is Dj Lix. As the number of daughters increased, so did his ranking to 5th place among the breeding bulls in Denmark. He is strong in terms of fertility and udder health and has a good longevity and vitality! Cow Nr. 01476 is Svend's dam. She is a daughter of Montana Jace, who not only has excellent feet and legs but has a good production inheritance as well. The dam also has a very significant milk yield. The grand dam has achieved more than 12 full lactations and can certainly be viewed as a long lasting cow with high percentages.

Svend is not just a well-built bull but he has a gentle character as well. Fortunately, he will not be a sire that passes on heavy birthing as his own sire was a very easy, calving bull.
