Date of birth	2018-01-10
Gest. length days	275
Gestation length	98
Calving ease	122
Straw colour	Green

Rowan van Maris is the fifth bull to emerge from the barns of the Hunnekes family in Grashoek. The breeding farm is not only causing a commotion in pure breeding circles, they have also consciously started a programme for ease of calving.

The family of Rowan and Senco share the same foundation cow. The vitality of the maternal line is excellent. At 275 days Rowan has a short gestation length. Rowan is also expected to give ease of calving with relatively good muscularity.

Rowan is an attractive bull, who, in our opinion, deserves four out of five stars for calving ease. Another bull suitable for beef on dairy use, who can add value to your calves.
