Breeder: Roelofs "Schut Hoeve", Vlagtwegge

- + Pedigree with reliable, proven breeding bulls
- + Outcross
- + High components in the pedigree

## BULL INFORMATION

Name	Schuthoeve Arteon	Date of birth	2018-01-01
Herdbook number	NL 615576868	Gestation length	284
A.I.-code	361183	Kappa Casein	BB
aAa code	432	Beta Casein	A1/A2
colour	RB	Cow family	Ineke
Breed	100% HF	Straw colour	Paars

K.I. SAMEN is always looking for good maternal lines, and the search regularly discovers new ones that meet the “SAMEN” selection criteria. The maternal line of Red Holstein bull Schut hoeve Arteon (Bitcoin x Insignia x Robeldo) is one of these as yet unknowns, but it is certainly an interesting cow family. This is a strain with an uncommon bloodline and sky-high components.

Given Arteon's extremely component-rich maternal line, the combination with the bull Bitcoin seems to be a logical one. The sire Bitcoin is a son of dairy bull Fun P. In addition to a very good milk yield, Bitcoin has also been assigned high marks for conformation and good breeding values for somatic cell count, fertility and durability.

As mentioned above, cows from Arteon's maternal line produce milk with particularly high components. The Ineke's have been known for several generations for protein percentages higher than 3.70% (in 305 days). The youngest two generations in the Arteon pedigree even realize lists with more than 4% protein for 305 days. And they achieve this in combination with significant milk production and more than 5% fat content. For the dam Ineke 233 and grand dam Ineke 222, these levels of production result in sky-high lactation values (averaging 125 and 127 over their respective...
